EXPERIENCE

MYDAPPR GROUP

Feb 2020 – present

FRONTEND DEVELOPER

Coinsino

Sept 2022 - Dec 2022

- Utilized Next.js to develop an SEO-optimized blockchain application that provides enhanced user experience and improved search engine exposure.
- Prioritized a mobile-first breakpoint system using tailwindcss to create a responsive user interface that adapts seamlessly to different screen sizes and devices.
- Collaborated with the backend development team to ensure seamless communication between the user interface and the blockchain network, resulting in a smooth and reliable user experience.
- Implemented secure user authentication by integrating MetaMask and WalletConnect into Coinsino dApp, ensuring the safety and protection of users' private keys.

Telostask

Dec 2021 - Jul 2022

- Developed the Telostask app landing page utilizing React.js and its component-based structure, resulting in a dynamic and efficient user interface.
- Contributed to the codebase verbally during team collaboration sessions.

MyDappr Landing-Page

Feb 2020 - Mar 2020

- Designed a landing page that clearly and effectively communicates the team's goals and accomplishments to visitors.
- Included detailed information about the team members and their respective roles, to provide a clear understanding of the team's capabilities and expertise.
- Implemented a user-friendly and easy-to-navigate layout to make it simple for visitors to find the information they need or to contact the team.

MYDAPPR GROUP

Feb 2020 – present

QUALITY ASSURANCE PERSONNEL

- Regularly tested for bugs on the platform and communicated them to the development team.
- Ensured the product was production-ready before shipping to end users.
- Tested both web and mobile apps on physical devices with different operating systems.
- Continuously monitored and improved the quality of the product.

SIDE PROJECTS

[Discord-Clone](#): A chat application using React.js, Styled Components and Firebase.

[PackMan](#): Created a Pac-Man clone using HTML, CSS and JavaScript during early learning stages on the Scrimba platform.

[PDF phrase counter](#): A Backend side project that lets users determine the number of times provided keywords appear in a PDF document.

ADDITIONAL

Technical Skills: HTML/CSS, JavaScript, Reactjs, TailwindCss, Nextjs, Etherjs, Firebase, Git.
